

Devanand Yadav

Mumbai, Maharashtra — +91 9137970686
devaydv18@gmail.com — Portfolio — GitHub

Professional Summary

Backend Developer skilled in building scalable REST APIs using Node.js, Express.js, and MongoDB. Experienced in authentication systems, Dockerized applications, cloud deployment, and secure backend architecture.

Technical Skills

Languages	JavaScript, TypeScript, C++
Backend	Node.js, Express.js, MongoDB
Testing	Jest, Supertest
DevOps & Cloud	Docker, AWS EC2, Nginx, HTTPS
Tools	Git, GitHub, Postman, Swagger

Experience

Backend Developer Intern — Stew Digital Solutions 2026

- Developed and maintained backend APIs for admin and user modules using Node.js and Express.js.
- Built RESTful APIs with authentication, authorization, and CRUD operations for scalable applications.
- Worked with MongoDB for schema design, aggregation pipelines, database management, and query optimization.
- Collaborated on debugging, API testing, deployment workflows, and backend architecture improvements.
- Participated in cloud deployment and server configuration using Docker, Nginx, and AWS EC2.

Projects

1. Ledger-Based Banking System GitHub

- Implemented double-entry (DEBIT/CREDIT) ledger ensuring financial consistency and auditability.
- Designed dynamic balance calculation using MongoDB aggregation pipelines.
- Built fault-tolerant transactions using MongoDB sessions and idempotency keys.
- Secured APIs using JWT, HTTP-only cookies, and token blacklisting.
- Dockerized and deployed on AWS EC2 with Nginx and HTTPS.

Stack: Node.js, Express.js, MongoDB, Swagger, Docker, AWS EC2, Nginx

2. Books API - Cloud Storage & Testing GitHub

- Built secure file upload pipeline using Multer and Cloudinary integration.
- Implemented JWT authentication and ownership-based access control.
- Developed centralized error handling middleware and automated API tests.
- Dockerized and deployed backend services on AWS EC2 with HTTPS support.

Stack: Node.js, Express.js, TypeScript, MongoDB, Jest, Supertest

3. AI-Powered Full Stack Blog Platform Live Demo

- Developed a MERN-based blog platform with JWT authentication and admin dashboard.
- Integrated AI-based blog generation using Gemini API.
- Added cloud image uploads using ImageKit.
- Designed scalable backend architecture using MVC pattern and RESTful APIs.

Stack: React.js, TailwindCSS, Node.js, Express.js, MongoDB, Gemini API, Vercel

Education

MCA — TIMSCDR, Thakur College, Kandivali (E) 2024 – 2026
CGPA: 7.3

BSc.IT — DTSS College of Commerce, Malad (E) 2021 – 2023
CGPA: 8.2
